Abstract (Basic): *WO 200256847* A1

NOVELTY - Composition comprising a fluorinated oil thickened with a polymer is new. The polymer has a molecular weight of 1,000,000 or less and comprises a skeleton of heteroatom-containing hydrocarbon repeat units and optionally pendant and/or 6-120C terminal fatty groups.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for a lipstick composition comprising a fluorinated oil thickened with a non-waxy polymer giving the composition the appearance of an elastic deformable solid with a hardness of 30-300 gf in the absence of wax.

USE - The composition is useful as a cosmetic product for the care, make-up or treatment of human keratinic materials, especially in stick form, especially as a mascara, eye liner, foundation, lipstick, blusher, deodorant, make-up remover, body make-up, eye shadow, concealer, shampoo, after-shampoo, sunscreen, face or body care product or nail varnish.

ADVANTAGE - The composition has good storage ability and forms films that are glossy, supple, comfortable, non-sticky and homogeneous. pp; 48 DwgNo 0/0
